

Green New Jersey Resource Team – Creative RFP
November 21, 2008

Dear prospective energy efficiency program Partner:

New Jersey's **Clean Energy** Program™ ("Program"), sponsored by the New Jersey Board of Public Utilities, is pleased to announce the 2009 New Jersey Change a Light Promotion. The goals of the 2009 Change a Light promotion are to (1) promote the sales of ENERGY STAR® qualified lighting products in New Jersey at reduced prices, (2) educate consumers and retailers alike on the benefits and uses of energy efficient lighting and appliances, and (3) to leverage manufacturer and retailer resources to promote New Jersey's other **Clean Energy** Programs™.

In 2009 there will be two possible tracks for Partner Participation in NJ Change a Light. A separate RFP , released at the same time as this one, offers manufacturers, distributors and New Jersey retailers (Trade Ally Partners) the opportunity to use program incentives to reduce the retail prices of ENERGY STAR qualified lighting products through product retail "markdowns". If you are interested in pursuing a markdown promotion, and did not receive the 2009 markdown RFP, we would be happy to send you a copy (the deadline for 2009 markdown applications is the same as for this RFP: **5:00 PM EDT January 15, 2009**)

The attached "Green New Jersey Resource Team" RFP is designed to accommodate creative approaches to promoting ENERGY STAR qualified lighting in NJ from Trade Allies and other Partners. This new RFP allows Partners to propose a broader range of creative activities. Proposed activities should pursue two primary goals: The first is to target residential customers who have been under-represented in past NJ Change a Light promotions. The second is to encourage residential customers to move beyond the "first step" of using energy efficient products (particularly CFLs) and to adopt more significant energy efficiency measures. Examples of approaches that might be covered by this alternative RFP include internet sales and community or workplace-focused promotions.

To participate in a 2009 NJ Change a Light Green New Jersey Resource Team promotion Partners must respond to this solicitation with a completed application by **5:00 PM EDT January 15, 2009**. This application must include:

- A cover letter describing the proposed Green New Jersey Resource Team promotion in detail, indicating manufacturer and retailer contacts, and signed by the named individuals.
- 2009 Change a Light Green New Jersey Resource Team promotion communication and marketing plans
- A completed 2009 Change a Light Green New Jersey Resource Team application form (see attached)

Funding for the 2009 New Jersey Change a Light Promotion will be about the same as it was in 2008 The Program will award Partners the right to use incentives on a competitive basis as described below. For more details, please see the attached Promotion Requirements and Guidelines.

If you have any questions, please contact Pedro Cabrera at (800) 225-0127 ext. 3027.

Sincerely,

The New Jersey's **Clean Energy** Program™

Enclosures

Change a Light Promotion – Green New Jersey Resource Team RFP Frequently Asked Questions

WHO IS ELIGIBLE TO SUBMIT A PROPOSAL AS A PROGRAM PARTNER? Eligible partners may include any Trade Ally Partner (lighting manufacturers, distributors and New Jersey retailers) as well as e-commerce retailers, local governments, non-profit organizations and other energy efficiency services providers.

WHAT TYPES OF ACTIVITIES ARE ELIGIBLE? The ability to receive Program incentives will be awarded to Partners based on the quality of the proposals, and at the discretion of the Program. A Program goal for projects under the Green New Jersey Resource Team RFP is to target residential customer market segments which have been under-represented in past NJ Change a Light promotions¹. Another goal is to provide a clear path for residential customers to move beyond the “first step” of using energy efficient products (particularly CFLs) and adopt more significant energy efficiency measures. Specifically, we would like to see proposals that include lead generation for the NJCEP Home Performance with ENERGY STAR, Cool and Warm Advantage HVAC, and other programs.

WHAT PRODUCTS ARE ELIGIBLE FOR INCENTIVES? Only products that are qualified under current ENERGY STAR programs (as of most recent list on energystar.gov website) are eligible. Some exclusions apply, please see Section IV below.

HOW ARE THE INCENTIVES PAID? Partners sign an agreement with the Program Market Manager detailing the objectives of the promotion, the numbers of ENERGY STAR qualified products to be included in the promotion, and how Program incentives will be applied to meet promotion objectives. To aid in tracking progress to ease accounting, incentives will be paid based on a set rate per ENERGY STAR qualified product delivered. Partners must submit an **approved** data report documenting that the agreed upon number of eligible products have been delivered, and that other promotion milestones have been met, in order to receive incentives.

WHO CAN APPLY? Any Program Partner with a creative approach for promoting ENERGY STAR qualified products may submit an application. This may include vendors who sell products through the Internet or by catalog. Trade Ally Partners are welcome to respond to both the markdown and Green New Jersey Resource Team RFPs. **Under the Green New Jersey Resource Team RFP only one proposal per Partner may be submitted for consideration, but a proposal may contain more than one promotion or creative concept.**

HOW MUCH MONEY IS AVAILABLE? The minimum creative request that will be considered in 2009 is \$50,000. **For 2009, no single Partner shall be awarded more than \$2,000,000 in creative promotion funding.**

HOW WILL MY APPLICATION BE EVALUATED? Each application will be scored on:

- Effectiveness at reaching residential customers who have not participated before in the NJCEP Energy Efficient Product Program,
- Ability to help motivate residential customers to participate in other NJCEP programs.
- The application of a range of high quality, ENERGY STAR qualified products,
- Ability to provide high quality data documenting progress towards goals.
- Clarity of the implementation plan.
- If applicable, prior program participation performance

Proposals must also explain how the Partner will make the most efficient use of incentive funds, and maximize Program participation per Program incentive dollar spent (Please refer to Section II on page 5 for promotion evaluation criteria and consideration.)

¹ The Program estimates that roughly 30% of NJ residential utility customers have not participated in past NJCEP Energy Efficient Products program promotions. Detailed data on non-participants is not currently available, but we believe these to include low-income, elderly, and non-English speaking residential customers.

HOW DO I GET STARTED? Review the application materials, including the Promotion Guidelines. Complete the application materials, including the Application Form and Funding Worksheet.

WHAT ARE THE IMPORTANT DATES?

2009 Change a Light applications due	5:00 pm on January 15,2009
Promotions Start	Upon signed agreement
Promotions End	December 31, 2009
Documentation for any final incentive reimbursement due by	January 31, 2010

WHERE DO I SUBMIT MY APPLICATION OR GET MORE INFORMATION? Proposals must be submitted electronically to the email address below and a hardcopy may be sent by post. (you may request an electronic version of the application):

2009 New Jersey Change a Light Promotion

Green New Jersey Resource Team

Promotion Requirements and Guidelines

I. Application Components

1. **Project Description:** Please provide a description, no more than 7 pages, of the proposed 2009 Green New Jersey Resource Team promotion. Describe each component of the promotion including the objectives of the proposed activities and the expected impact those activities will have on the penetration of ENERGY STAR qualified products, on program participation by underserved residential customer segments, and on leads generated for participants in other NJCEP programs. The description must also indicate how New Jersey's Clean Energy Program messaging will be incorporated into these activities throughout the promotion (submit sample messaging with proposal). Clearly describe the role of each participating party (i.e. manufacturers, corporate partners, municipalities, citizen volunteers, etc.) Note which party will be the primary contact and who will submit the proof of performance documentation.
2. **Use of Program Incentives:** In the proposal, please explicitly break out how incentives will be used. For example, if the proposed promotion involves a retail price incentive, list the pre-incentive retail price for each ENERGY STAR product before any Program incentive is applied, and the projected retail price NJ consumers will finally pay for the product. (see attached application form). Also provide detail on costs incurred in pursuit of other promotion activities such as marketing, outreach to non-participants and/or identifying potential leads for other NJCEP programs.

Proposals for the use of program incentives should be developed on a pay-for-performance basis. Suppose, for example, that a proposed promotion is designed to reach underserved customer segments with discounted CFLs and also recruit these new participants into the NJCEP Home Performance with ENERGY STAR program. In this case Program incentives might be paid in three ways: one amount per CFL distributed, a second amount for each non-participant recruited, and a third amount for each lead referred to another NJCEP program². Making Program payments to Partners on an incentive-per-unit basis both ensures that the Program pays for measureable performance, and allows comparison of cost-effectiveness between proposals.

3. **Sample Proof of Performance Documentation:** Payments for incentives under the 2009 Green New Jersey Resource Team RFP will be made based upon proof of performance reports showing progress toward goals described in the proposal and included in the agreement with Program management. Proposals must include sample reports in order to be considered. The sample reports must be approved by the Program prior to final agreement with the Program. Reports should be provided on a monthly basis unless a less frequent period is agreed. Final documentation for all incentive payments must be submitted no later than January 31, 2010.
4. **Timeline:** A complete application must include a timeline for the proposed promotion, including the anticipated start date and end date for each activity, and any other important dates. Projects may begin as soon as the Partner agreement is signed, and end by December 31, 2009.

² Applications that include non-participant recruitment and/or lead generation objectives should include detailed proposals of how, for example, non-participants will be identified and what constitutes a qualifying referral to another program.

II. Proposal Evaluation Criteria & Consideration

Proposals that meet the promotion requirements will be evaluated based on the following criteria:

1. **Ability to recruit non-participants.** Proposals should target residential customers who have not participated in past NJ Change a Light promotions.
2. Ability to incorporate common 2009 Green New Jersey Resource Team messaging in preparation of marketing and communications materials.
3. **Lead generation for other programs.** Proposals should describe how a promotion will help residential customers to adopt more significant energy efficiency measures through participation in other NJCEP activities.
4. **Clear Strategy and Reporting.** Proposal should include a detailed plan for documenting progress toward stated objectives, and for reporting such progress.
5. **Verified Quality Product.** Preference will be given to ENERGY STAR qualified lighting products that have undergone additional, independent, third party testing not paid for by the manufacturers with results indicating performance meeting or exceeding ENERGY STAR requirements.
6. **Consumer Choice.** Preference will be given to proposals that offer a variety of ENERGY STAR qualified products
7. **Ability to Leverage Resources.** Proposals should indicate resources the Partners are providing to the project, including but not limited to financial contributions.
8. **Customer Education.** Preference will be given to proposals that use targeted messaging to clearly communicate the features and benefits of ENERGY STAR qualified products, and that effectively describe other NJCEP program benefits.
9. **Performance:** Prior program participation performance.

III. Promotion Requirements and Guidelines

- **Partners must provide communications throughout the promotion indicating that the activity (and associated products) is provided courtesy of New Jersey's Clean Energy Program™.** A standard template for using Program logos will be provided.
- The ENERGY STAR logo and Program logo(s) must be identified in promotional communications.
- Only promotions conducted in a manner that will reach New Jersey residents shall be eligible for promotion funds. The Program reserves the right to reject proposals that are not targeted mostly to New Jersey residents.
- All marketing materials must be submitted to the Program management for approval before distribution.

IV. General Eligibility

Proposals considered under the Green New Jersey Resource Team RFP should include promotions that cover only one or more of the following eligible products:

- ENERGY STAR qualified screw-based compact fluorescent light bulbs (CFL).
- ENERGY STAR qualified indoor and outdoor permanent and portable fluorescent lighting fixtures, including ventilation and ceiling fans with light kits.
- All promotional products must be qualified under the most current version of the relevant ENERGY STAR specification.(as listed on www.energystar.gov)

The following products are NOT eligible for incentives:

- ENERGY STAR qualified outdoor fixtures which do not use a fluorescent lamp
- Light fixtures utilizing solid state lighting (SSL) technologies such as LEDs that have been qualified as ENERGY STAR compliant by the US Environmental Protection Agency (SSL light fixtures qualified as ENERGY STAR compliant by the US Department of Energy are eligible.)

- Other ENERGY STAR qualified appliances

To be eligible to participate in the promotion, Partners must meet the following criteria:

1. Partners must complete all approved promotions by December 31, 2009. Promotional activities undertaken after December 31, 2009 will not be eligible for incentives.
2. Partners will cooperate fully with Program requests for information on specific promotional activities.
3. Partners will cooperate fully with Program field staff and provide access to promotional events, ENERGY STAR products in inventory, etc.
4. Partners must have a method for tracking and recording the actual (or estimated) impact of the proposed activities.

In no event will the Program make any payments to Partners prior to the execution of a signed agreement.

Partners shall report immediately any suspected incidents of irregularities or fraud to the Program.

Reimbursements of incentives will be made only upon submission by Partners of proof of performance showing actual progress towards objectives during the promotion period ending December 31, 2009. Requests for reimbursement must be consistent with the objectives, metrics and incentive amounts included in the agreement between the Partners and the Program.

The Program reserves the right to verify proof of performance documentation submitted. If all elements of the proposed project(s) are not complete, or adequate proof of performance is not submitted by the specified date, the Program reserves the right to pro-rate the amount of the payment to reflect only the portion of the project that was completed and documented. Fraudulent documentation may result in prosecution, termination from the promotion, and non-payment of all outstanding claims.

The Program will monitor the progress of activities during the promotional period by comparing submitted proof of performance documentation against sales milestones included in the agreement between the Program and the Partners. If milestones are not met, the Program reserves the right to reduce the amount of incentives awarded.

The Program reserves the right to impose additional requirements, as necessary, in order to maintain the integrity of the Program.

The promotion design and funding outlined in these rules and related promotion materials reflect the current intent of New Jersey's **Clean Energy** Program™ and the New Jersey Board of Public Utilities (BPU), but may be modified by the Program at any time and without prior notification. The Program may terminate a project at any time for non-compliance.

Partners cannot state or imply that they have been rated, ranked, or endorsed by the Program. Partners may not use or display any of the logos, names, or identity unless approved in advance by the Program.

It is the Partner's responsibility to ensure that all uses of the ENERGY STAR logo and name associated with activities co-funded under this promotion comply with ENERGY STAR program requirements.
