In Our Restaurant

Most of the time, we're too busy preparing food to think about our energy bills. The new food service equipment incentives from *New Jersey's Clean Energy Program*[™] gave us a chance to replace our outdated cooking, cleaning, holding units, and even our refrigeration. The drop in our utility bills made a big impact on our bottom line.

That's A Recipe For Success.

To get your share of the incentives and savings, visit NJCleanEnergy.com/FOOD or call 866-NJSMART to speak with a program representative.

Recover, restore, and rebuild after Hurricane Sandy. Visit NJCleanEnergy.com/SANDY to learn about enhanced incentives for homeowners, government officials and business owners.
