

RE Stakeholder Meeting

June 13, 2017

1:00 – 3:30 PM

Board of Public Utilities Meeting Room

Meeting Notes

Regulatory Updates

June Board Agenda

- One subsection (t) landfill solar project - EPP
- 6th Round Results for EDC SREC II Finance Program
- Motion for Reconsideration - Crius Energy

Final adjustment to the FY17 Clean Energy budget

- Allocating \$1M to Microgrid Feasibility study budget from the RE Electric Storage line
- Allocating \$3.7 M into EE Products primarily under lighting from the Home Performance Program
- Shifting funds to support program participation for this year
- State Energy Initiative budget increased from \$138M to \$208M
- Changes have been circulated for public comments with the comment period ending on 6/16

FY 18:

- Supplemental posting about outreach – comment period ends 6/20
- There is a public hearing this Friday, 6/16 at the DEP Public Hearing Room

CRA/FY18 Budget

- Reviewed expenditure reports and proposed budgets posted on NJCEP Website

Update on Solar Act

Subsection (q)

Deadline for Energy Year 2016 project commercial commencement was 5/31/2016. Two more projects were authorized to energize by the deadline. Four projects, totaling 20.519 MW required commencement prior to 5/31; one project is under appeal and the other three may be impacted by pending legislation. There are a total of 30 projects that have been constructed under Subsection q.

Subsection (r)

- The changes to the RPS rules became effective on 4/17/2017. In a subsequent Order, the Board waived the first application round in EY18 (June 1, 2017) because of the late effective date of the rule amendment.

- Board staff anticipates a request for comment will be issued on subsection r provisions later this week.
- The comment period will close 6/29
- Staff will make recommendations to the Board on the amount of capacity that should be made available for subsection r projects with a target of getting on the July agenda. The capacity recommendations will be for the entire year.
- The first application round would open on 9/1 if the Board decides to make capacity available.

Subsection (s)

- A few conditionally approved projects submitted changes of ownership.
- No changes in capacity have been reported since the April monthly report

Subsection (t)

- One new project has submitted an application for conditional certification and another is scheduled for the June Board agenda meeting.

SREC Registration Program Update:

- Consumer Protection: There is one pending issue with the proposed Consumer Disclosure form under development which is the Electronic Signature. We have been having conversations with the developers and entities involved. We will have our recommendation to Staff by end of July.
- Initial registrations and finals are being processed within a couple of days, less than a week.
- SRP staff has been cross-trained on other Clean Energy Programs.
- There are a lot of mistakes happening on the final paperwork that is being submitted with approximately 800-1000 final as-builts that need corrections.
- The monthly installation reporting format has changes from QA/QC to PTO for those projects that have a PTO. We will talk to PJM about missing PTO dates.

Interconnection Issues

- A couple of TPO issues/complaints have been submitted by consumers to staff for review

RPS Issues

- The NJ RPS market is currently in the EY17 True Up period (June 1 to Oct. 1) with BGS/TPS finalizing tallies of retail sales figures for the period and preparing reports for compliance
- PJM schedule for reconciliation
- Staff will host a Public meeting with TPS/BGS/EDCs and GATS on 6/16 at 1pm in Trenton to discuss retail sales reconciliation and RPS compliance procedures

Next Meeting

- August 8, 2017 in Trenton

Meeting Adjourned
