

A CLIMATE
CHANGE SOLUTION

New Jersey
CleanPower
ChoiceProgramSM

**It's a simple, easy
way to choose
clean power.**

Your family has the power to make a difference – right at home. Start by signing up for the New Jersey **CleanPower Choice Program**. It's a simple way to have your electricity come from clean, renewable energy sources like solar power, wind power, low-impact or small hydro power, or landfill gas power. Clean power that's good for the environment, good for the climate, and good for New Jersey. Participating helps lower greenhouse gas emissions and is just one way you can be a part of Governor Corzine's plans to use energy more wisely in New Jersey. Every household that signs up can avoid over 10,000 lbs. of CO₂ emissions per year – the same as planting 1.35 acres of trees! * And all it costs is about \$5 to \$9 extra a month for the average New Jersey home. Sign up today. Start making the choice for a cleaner tomorrow.

**Look for the insert in
your electric bill for
details and how to
sign up.**

A clean and simple energy solution.
