

2012 Large Energy Users Pilot Upcoming Open Enrollment

For 2012, the New Jersey Board of Public Utilities and its *Clean Energy Program* (NJCEP) are proud to continue an exciting new energy efficiency incentive targeted to serve the largest commercial and industrial utility customers in the state. The “Large Energy Users Pilot” (LEUP) intends to provide attractive incentives for self-invested energy efficiency projects. This opportunity will only be available to a select group of entities meeting the overall intent and requirements of the program as outlined below.

Incentive Specifications

Maximum incentive per entity lesser of:

- \$1 million
- 75% of total project(s) cost
- 90% of total NJCEP fund contribution in previous year (i.e. from all entity facilities)
- \$0.33 per projected kWh saved; \$3.75 per projected Therm saved annually

Eligibility and Pre-Qualification

- An open enrollment period (45 days) will be established for entities¹ to submit qualifications for participation.
- To qualify, eligible entities must have contributed a minimum of \$300,000 into *New Jersey's Clean Energy Program* fund in calendar year 2011 (aggregate of all buildings/sites).
- The total 2011 contribution is calculated as \$0.0169/therm times total therms plus \$0.002346/kWh times total kWh [i.e. NJCEP Contribution 2011= (\$0.0169/therm x total therms) + (\$0.002346/kWh x total kWh)].
- In order to be considered for incentives, the average billed peak demand of all facilities submitted in the Draft Energy Efficiency Plan (DEEP)/Final Energy Efficiency Plan (FEEP) must meet or exceed 400kW and/or 4,000 DTh².
 - *Example:* Entity submits DEEP/FEEP for two buildings. Building one has an annual billed peak demand of 200 kW, building two has an annual billed peak demand of 600kW. Per the above guideline, both buildings would be considered for incentives as the average of the two is equal to 400kW.

¹ Entity shall be defined as (1) Public: having distinct and separate budgetary authority; (2) Public Schools: having distinct and separate budgetary authority; (3) Private: Non-residential companies including all related subsidiaries and affiliates regardless of separate EIN numbers or locations within New Jersey. Consistent with DOCKET NO. EOO7030203.

² For campus facilities, the 400 kW or 4000 DTh threshold shall be met on a campus-wide level (i.e. total demand of campus). Any number of buildings may be included in the Energy Efficiency Plan.

- Qualifying entities will be ranked by amount of contribution to the NJCEP fund in 2011 from all eligible facilities (400 kW average annual billed peak demand or greater).
- Top entities will be approved to submit their Draft Energy Efficiency Plan (DEEP) for fund reservation.

The LEUP Open Enrollment Period is set to begin February 13th, 2012.

Visit the website for complete LEUP guidelines and additional details. Please be aware that acceptance and participation in this pilot will exclude customers from obtaining incentives through any other NJCEP funded initiatives.
