

Renewable Energy Incentive Program (REIP) Application Conversion REIP to SRP

The *Renewable Energy Incentive Program* (REIP) is designed to provide New Jersey ratepayers with incentives that help cover a portion of the cost of a renewable energy system. However, there may be times when an application received during a funding cycle is not able to be approved due to the dollar value of received applications exceeding the available funds. Should this happen and the available funds are expended before an application can be processed, this document will allow the applicant to automatically withdraw their REIP application and transfer that application to the *SREC Registration Program* (SRP). By doing this, the applicant will still be able to register the solar system and earn SRECs, but the project will no longer be eligible for a rebate through the REIP or through any future solar rebate from *New Jersey's Clean Energy Program™*.

The applicant, system owner, and contractor need to sign this form to acknowledge their understanding and acceptance of this process.

I, _____, (system owner) hereby agree that if this REIP application is not able to be funded for a rebate during the solar funding cycle in which the application was submitted, I authorize REIP administrators to withdraw this application from REIP and to transfer it to the SRP.

I understand that I cannot have two applications submitted for the same system in two programs at the same time, and that by signing this document I agree to the terms outlined above.
