

Any style or size home can meet the *New Jersey ENERGY STAR Homes* standards for superior energy performance, using 15% - 35% less energy.

Call **866-NJSMART** to find out more ways to save energy, money, and the environment or visit **NJCleanEnergy.com** for more information about *New Jersey's Clean Energy Program*.

New Jersey ENERGY STAR[®] Homes / Built to be better. Performance tested to prove it.

Benefits of a New Jersey ENERGY STAR Home:

- Lower energy bills
- Less energy use
- Improved indoor air quality
- Third-party testing and verification
- A quieter home
- Improved year-round comfort
- Better for the environment

New Jersey ENERGY STAR Homes is brought to you by the New Jersey Board of Public Utilities and New Jersey's Clean Energy Program. © 2009 New Jersey Board of Public Utilities. All Rights Reserved. New Jersey's Clean Energy Program does not endorse any one particular builder.

Before you break ground, ask your builder about *New Jersey ENERGY STAR Homes* for a lifetime of savings.

Think how much you'll save by building a New Jersey ENERGY STAR Home.

New Jersey's **Clean Energy Program**[™] and builders throughout the state are working together to make *New Jersey ENERGY STAR Homes* available to you. If you're purchasing or building a new home, you'll want to know about this program. These homes are well constructed, energy efficient, less expensive to operate, and offer improved year-round comfort and indoor air quality.

Benefits are built right in — and built in right.

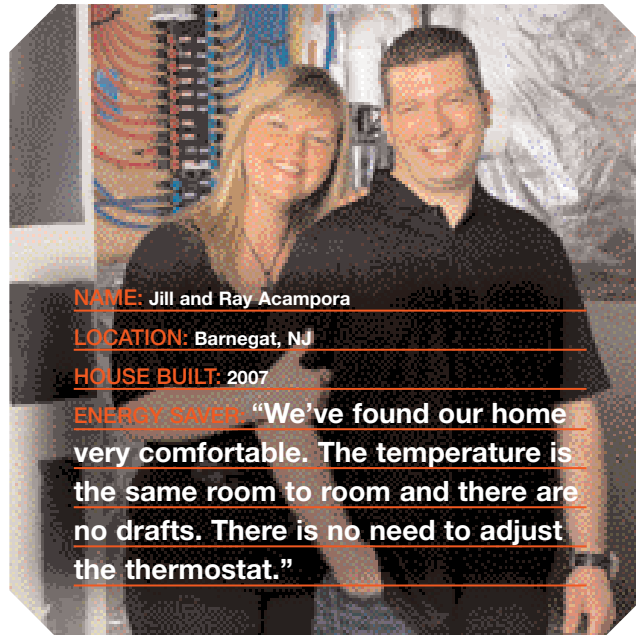

When it comes to energy, *New Jersey ENERGY STAR Homes* outperform other new homes. They are better designed and constructed for maximum energy efficiency. They use 15%-35% less energy than the average new home. And using less energy means lower energy bills and a reduced environmental impact.

New Jersey ENERGY STAR Homes certification is your assurance that your new home meets the program's energy efficiency requirements.

Built to be better with:

- High-efficiency heating, cooling, and water heating systems
- Added levels of insulation in walls, foundation, and attic
- Sealed and insulated duct systems
- ENERGY STAR qualified windows
- ENERGY STAR qualified appliances and lighting

When you build a New Jersey ENERGY STAR Home, you'll use 15%-35% less energy, making your home more affordable to buy, operate, and maintain. It doesn't have to cost any more to build this way and you'll be helping the environment, too.

NAME: Jill and Ray Acampora

LOCATION: Barnegat, NJ

HOUSE BUILT: 2007

ENERGY SAVER: "We've found our home very comfortable. The temperature is the same room to room and there are no drafts. There is no need to adjust the thermostat."

"We have lived here now through winter and summer. This house is twice the size of our old house, but our utility bills are the same, or even a little cheaper."

Jill and Ray Acampora

Third-party testing

Benefits of *New Jersey ENERGY STAR Homes* are assured through an energy analysis based on home design, inspection at key construction stages, and performance testing upon completion to certify that your new home meets program standards.

Be sure your new home is a New Jersey ENERGY STAR Home.

Any builder of residential new construction in New Jersey is eligible to participate in *New Jersey ENERGY STAR Homes*. For more information for you and your builder, call **866-NJSMART** or check our website at **NJCleanEnergy.com**.
