

Notice: New Jersey's Clean Energy Program – Online Portals Open

SREC Registration Program (SRP) Online Portal

As of March 1, 2016 all SRP registrations will be submitted through an [online portal](#). This new electronic process is intended to streamline the review and approval of all SRP registrations, and reduce the backlog of registrations awaiting processing. Registrants will have the opportunity to enter project specifications as well as upload supporting documentation. Paper registrations will **no longer** be accepted and will be returned to the sender via US mail.

Electric Storage Online Portal

The [online portal](#) for the FY 2016 Renewable Electric Storage Program opened at 9:00am on March 1, 2016. The program provides financial incentives for electric energy storage systems that are integrated with Class 1 renewable energy projects installed behind-the-meter at non-residential customer sites.
