Annual Net Metering Report

June 2008

Rockland Electric Company

Rockland Electric Company
Annual Net Metering Report

June 2008

1. The total number of customer-generator facilities

For the one-year period ending May 31, 2008, Rockland Electric Company (the "Company") has thirty-six customer-generator facilities.

2. The total estimated rated generating capacity of its net metering customer-generators

The total estimated rated generating capacity of its net metering customer-generators is 949.8 kW.

3. The total estimated net kilowatt-hours received from customer-generators

The total net kilowatt-hours received from customer-generators for the one-year period ending May 31, 2008 is zero kilowatt-hours. The net energy usage by these customer-generators for the one-year period ending May 31, 2008 is 3,364,232 kilowatt-hours.

4. The total estimated amount of energy produced by the customer-generators

Since the generators of the net metering customers are not separately metered (the meter is located at the customer's service entrance), the Company cannot determine the amount of energy produced by these customer-generators.
