

# New Jersey's Clean Energy Program™ Solar System Metering/Monitoring Worksheet

An ANSI C.12 certified meter is required for any residential system > 10kW and all non-residential systems. This is in addition to the existing utility meter.

## A. SYSTEM METERING

Meter Manufacturer: \_\_\_\_\_ Meter Model: \_\_\_\_\_ Meter Serial #: \_\_\_\_\_

This meter is ANSI C.12 certified (required for all systems).

This meter has a minimum accuracy rating of:

- 5% (required for systems up to 10 kW)
- 1% (required for systems larger than 10 kW)

## B. SYSTEM MONITORING

Energy production data from this system will be reported monthly to the SREC Administrator via:

- Self-reporting of actual monthly meter reads (required for systems up to 10 kW)

Mail or hand deliver completed package to:  
(Faxes and e-mails are not accepted.)
