

Supplemental Analysis of Solar Grid-Supply Projects

Mitigating Solar Development Volatility: Analysis of the NJ Solar Project Pipeline

The purpose of this slide is to supplement the table appearing on page 8 of the presentation given at the April 9, 2013 NJBPU Renewable Energy Committee Meeting (*Mitigating Solar Development Volatility: Analysis of the NJ Solar Project Pipeline*).

Supplemental analysis herein has benefited from additional data appearing on the April 29 BPU agenda.

- (A) The data presented on April 9, 2013 used the Subsection S Notice Listing as a starting point.
- (B) The supplemented data (April 23, 2013) presumes that the projects listed in Item 8C of the April 29, 2013 BPU Board meeting agenda represents all projects that submitted packages in December 2012, and therefore uses that listing as a starting point.

Criteria	Note (A)		Note (B)	
	April 8, 2013		April 23, 2013	
	Projects	~MWdc	Projects	~MWdc
Appear on the April 29, 2013 BPU Agenda in Item 8C			57	
Timely Filed Subsection S Notice (Sept 2012)	74	738	52	555
Met above criteria <u>and</u> received System Impact Study prior to June 30, 2011	55	565	46	481
Met above criteria <u>and</u> were not removed from active status at PJM since December 2013	49	503	43	447
Met above criteria <u>and</u> have land use approvals	35	344	28	274

Note: The data summarized above is reasonably accurate, but may be subject to immaterial inaccuracy due to limited publicly available data. It is not the purpose of this document to demonstrate precision, but rather to provide trend analysis and observations.
