Assigning NJ Certification Numbers for New Capacity to Existing Systems

- Add On to Existing Systems (Same SREC meter)

The same NJ Certification number from the existing system will be assigned to the new capacity and the existing qualification life without any adjustment.

- Add on to Existing System or Phases (New ANSI C12 meter installed)

Install a separate ANSI C12 revenue grade meter for the new capacity and receive a new NJ Certification number with the full 15 year qualification life for the add on.

When should I use the System Change Forms

- System upgrades or downgrades
- Sale of Home
 - Buyer and Seller are required to sign the System Change Form
 - Agreement of Sale must be submitted to PJM-GATS
 - If it is not specifically written into the contract that the SRECS will remain with the previous owner (seller) than the default is that they stay with the system and are the property of the new homeowner (buyer)
- If homeowner is deceased PJM-GATS requires a copy of the death certificate
- Changing/Moving system to new location
 - The system must remain in the State of new Jersey
 - Sale Agreement of old house must be submitted to PJM-GATS
 - Interconnection document for new home must be submitted to PJM-GATS showing the new interconnection date
- System Change Form is required to change ownership of the system

Schedule A Form

- Schedule A Form is filled out by the system owner allowing another party to register, trade or track their SRECS
- All aggregators and PPA must get a Schedule A Form from the host/applicant
- If an SREC contract is currently in place, this form does NOT supersede the contract agreement

Add On to Existing System

Current Process For All Add On: Submit complete SRP Registration

Issue: Ability to accurately track installed capacity vs. Cost Consideration

Discussion-How should we handle add ons?

- Continue requiring complete SRP Registrations?
- Is the System Change Form sufficient?
- Require complete SRP Registrations up to specific capped capacity?
- Require new SRP Registrations for add ons with new meter only?
- Create a short NJCEP form?
