ENERGY STAR Refrigerator Facts

Slash your energy bills. The U.S. Department of Energy requires that ENERGY STAR qualified refrigerators use 20% less energy than models not labeled with the ENERGY STAR logo.

Replace your old fridge for bigger savings.

If you still have a fridge from the 1980s, replace it with an ENERGY STAR qualified model and save over \$100 each year on your utility bills. Replace a fridge from the 1970s and save nearly \$200 each year!
