

Combined Heat & Power (CHP) and Fuel Cell Program

New Jersey's Clean Energy Program is pleased to announce the non-renewable **CHP and Fuel Cell program** is now available. The New Jersey Board of Public Utilities recently approved this program on the October 16th Board agenda.

The website has been updated with current program information and the application is now available: www.NJCleanEnergy.com/CHP.

Please keep in mind that the new application is now Excel-based and the formatting is significantly different than what you may be used to in previous program years. Also, some eligibility requirements have changed. Therefore, please take time to review the new application and familiarize yourself with the new information.

Questions may be addressed to 866-NJSMART (657-6278), option 4.
