

## Notice of Changes

### Commercial & Industrial Energy Efficiency Programs

#### Fiscal Year 2014 (July 1, 2013 – June 30, 2014)

On June 21, 2013, the NJ Board of Public Utilities approved the following changes to Commercial and Industrial Clean Energy Programs effective July 1, 2013 (except as noted otherwise). For NJ SmartStart Buildings prescriptive incentives ONLY, customers will be provided a 30-day grace period to submit 2013 applications. After July 31, 2013, customers will be required to utilize the new fiscal year 2014 NJ SmartStart Buildings prescriptive applications. For questions on program changes or other details, please contact the C&I Market Manager at (866) NJSMART (Option 4).

#### **C&I Retrofit and New Construction Equipment Incentives (Effective August 1, 2013)**

##### *Lighting*

- LED Prescriptive Lighting – For LED lamps (integral/screw in), the current incentive is \$20/lamp. The new incentive is \$10/lamp for certain types of bulbs/fixtures and \$20/lamp for others. Please refer to the July 1, 2013 through June 30, 2014 application for further details.
- LED Stairwell and Passageway Luminaires – Current incentive is available under the custom path, and the new prescriptive incentive is up to \$40 per fixture.

##### *Lighting Controls*

- The current incentive is from \$25 to \$75 per fixture controlled for day lighting dimmers. The new incentive is \$45 per fixture controlled.
- The current incentive is from \$25 to \$75 per fixture controlled for Hi-Low controls. The new incentive is \$35 per fixture controlled.

**Applicants have until 5:00 pm on July 31, 2013 to submit a complete application package under the 2013 program incentive levels.** A properly completed application package includes an application completed and signed by the customer, a W9 form for the Payee, recent electric or natural gas utility bill (12 months including third party supplier required for custom applications), and equipment manufacturer specifications documents. This information must be submitted before equipment is installed.

#### **Combined Heat & Power (CHP) and Fuel Cells (Effective July 1, 2013)**

- The existing small and large scale CHP-Fuel Cell programs will be combined into a single program for fiscal year 2014. Details on the new program will be available shortly.
- References to CHP powered by Class 1 Renewable Fuel Source have been removed.
- Customers should refer to the FY14 Honeywell Renewable Compliance Filing for requirements and funding details for CHP-Fuel Cell systems that use a renewable fuel source.

#### **Pay for Performance – New Construction (Effective July 1, 2013)**

- Language has been added to clarify that participants that need to start construction prior to approval of the Energy Reduction Plan (ERP) may do so. TRC must conduct a pre-inspection of the

site prior to installation, which will require an application submission. Measures installed prior to pre-inspection will not qualify. Customers proceed at their own risk pending approval of the ERP.

**Large Energy Users Program (Effective July 1, 2013)**

- The incentive cap is increased from \$1 million to \$4 million per eligible entity, per program year.
- Draft Energy Efficiency Plans are no longer a part of the program.
- The program will have an open enrollment process and will be available on a first-come, first-served basis, pending the availability of funds.

**Hurricane Sandy Relief Incentives**

- Sandy Relief incentive enhancements have been extended to June 30, 2014.

**Miscellaneous**

- Effective June 7<sup>th</sup>, the Board modified its policy on Smart Growth such that any new construction or gut rehabilitation, or expansion of existing facilities, will not need to be located in areas designated as Smart Growth in the State. This revised policy is applicable for both residential and commercial construction.
- References to the NJ Economic Development Authority (EDA) Revolving Loan Fund have been eliminated.
