

Commercial & Industrial Energy Efficiency Programs

[New program change effective October 19, 2015:](#)

NJ SmartStart Buildings

New Applications

Effective immediately, customers submitting **new** SmartStart prescriptive and custom applications will be required to respond to deficiency notices within 30 days from the date of the notification. If additional deficiencies are still noted, there will be up to two additional notifications issued with the same timeframes. If a customer fails to respond to a deficiency request within 30 days or exceeds the three attempts provided, the application will be cancelled. If cancelled, customers may reapply under the program incentives and requirements in place at that time.

Existing Applications

For existing applications under review that have not been approved, the program will honor the response timeframe provided in the latest deficiency notice. If information is submitted and additional deficiencies are still noted, up to two additional 30 day notifications may be issued. Should deficiencies still be outstanding, the application will be cancelled. If cancelled, customers may re-apply under the program incentives and requirements in place at that time.

If you have questions regarding program changes or effective dates, contact TRC at 866-NJSMART (657-6278), extension 2.
