

**New Jersey Board of Public Utilities
Community Solar Energy Pilot Program: Program Year 2
Project Scoresheet**

General Notes:

- The New Jersey Community Solar Energy Pilot Program Year 2 Application Form was approved by the Board on October 2, 2020. The application window closed on February 5, 2021 at 5:00 p.m.
- NJBPU received 412 applications by the February 5, 2021 deadline.
- Out of the 412 total applications received, 299 applications were found to be complete, 108 applications were found to be incomplete, and 5 applications were withdrawn.
- This spreadsheet presents scores for the 299 complete applications.
- Incomplete and withdrawn applications were not scored, and are not included in this spreadsheet.
- The PY2 available capacity was 150 MWdc, with the flexibility to allocate up to 10% (i.e. 15 MW) over or under this 150 MW capacity limit.
- The PY2 available capacity was divided between the Electric Distribution Company ("EDC") service territories based on their average respective percentages of in-state retail electric sales (see rules at N.J.A.C. 14:8-9.4(d)).
- The PY2 available capacity was divided between the EDC service territories as follows:
 - ACE: 18.525 MWdc
 - JCP&L: 43.29 MWdc
 - PSE&G: 85.305 MWdc
 - RECO: 2.88 MWdc

Project Information:

- Column A contains each project's individual BPU Docket Number.
- Column B contains the Project Name, as identified by the Applicant in the Application Form. Projects granted conditional approval by the Board are highlighted in green.
- Column C contains the Applicant Name for each project, as provided by the Applicant in the Application Form.
- Column D contains the project's nameplate capacity for projects granted conditional approval in MWdc, as approved in the October 28, 2021 Board Order.
- Column E contains each project's EDC service territory.
- Column F contains each project's score (complete applications only).

Selected Applications:

- On October 28, 2021, 105 complete applications were granted conditional approval by the Board. Selected applications are highlighted in green in column B.
 - ACE: 7 projects; 21.323 MWdc
 - JCP&L: 28 projects; 47.4487 MWdc
 - PSE&G: 67 projects; 90.32454 MWdc
 - RECO: 3 projects; 5.599 MWdc
- The total capacity granted conditional approval by the Board was: 164.69524 MWdc. The Board awarded the full capacity for the last project selected in each EDC.
- The average size of projects granted conditional approval by the Board was: 1.569 MWdc
- The minimum size of projects granted conditional approval by the Board was: 0.2109 MWdc
- The maximum size of projects granted conditional approval by the Board was: 5 MWdc
- The Board Order is available at the following link: <https://nj.gov/bpu/pdf/boardorders/2021/20211028/81%20ORDER%20Community%20Solar%20PY2%20Awards.pdf>

Projects Scoring:

- Projects were scored based on the Program Year 2 Evaluation Criteria defined by the Board (Appendix C of the Program Year 2 Application Form).
- The Program Year 2 Application Form is available at the following link: <https://www.nj.gov/bpu/pdf/boardorders/2020/20201002/8C%20-%20ORDER%20Community%20Solar%20Year%202%20Application%20Form%20and%20Process%202020-10-01.pdf>
- Each project's total score is in column F
 - The average project score was 80.6
 - The minimum project score was 42.3
 - The maximum project score was 98
- Projects were divided first by EDC, then ranked by score. Projects were selected starting with the highest-scoring projects first, until the capacity for each EDC was filled. The last project to be selected was included in full, i.e., no project capacity was cut off from what was the proposed MWdc in the application.

BPU Docket Number (Project ID; sorted by Docket Number in ascending order)	Project Name (Projects granted conditional approval are highlighted in green)	Applicant Name	Project Size (in MWdc; projects selected by Board Order)	EDC Service Territory	Score
