Subject: RE: Next Step in the Proceeding to Investigate Solar Development Volatility at RE Committee Meeting - Trenton
Wednesday 4/9/13 at 1 PM
Date: Wednesday, April 03, 2013 4:33:10 PM
Attachments: [ATT00001.txt](#)

RE List:

Staff have received a request from MSEIA to present an analysis it has conducted on solar market volatility at Tuesday's RE Committee meeting.

At the last RE Committee meeting on March 13, I suggested that staff would circulate a summary of the status of this Solar Act proceeding, the process followed to date, and a summary of public comments received on defining solar development volatility before moving the discussion to potential measures to mitigate what's been defined as solar development volatility.

Before completing the problem definition portion of this proceeding, I'd like to accommodate MSEIA's offer to present their modeling results which will be added to the comments and record accumulated to date. Please let me know if other stakeholders have performed a similar analysis that they would like to present at Tuesday's RE Committee meeting. Send me your results and I will add you to the agenda. We will start the discussion of potential measures to mitigate volatility at the May RE Committee meeting.
