

Don't miss out on these great incentives!

- **Low-interest financing and rebate options** are available to pay for the improvements.
- **Incentives are also available** for multifamily buildings and complexes.
- **Check NJCleanEnergy.com/HP** for funding that may be available for municipal electric, oil or propane customers.
- **Additional incentives** may be available for residents living in an Urban Enterprise Zone (UEZ).

HOME PERFORMANCE WITH ENERGY STAR®

“Creating a more energy efficient living space just makes sense, but the fact that a State-sponsored program will help pay for it makes it a no-brainer. The repairs pay for themselves; make my home more comfortable year-round and increase its market value. I am pleased to know that my home's greenhouse gas emission is less in a time of climate uncertainty.

-Denise H., Homeowner

BPI GoldStar™
CONTRACTOR

The Building Performance Institute (BPI) is a national building performance credentialing, quality assurance and standards setting organization.

All contractors in New Jersey participating in Home Performance with ENERGY STAR are required to be BPI GoldStar Contractors.

New Jersey's Clean Energy Program is a statewide program administered by the New Jersey Board of Public Utilities that promotes energy efficiency and renewable energy for all New Jersey ratepayers, including residences, businesses, schools, and municipalities. For more information on incentives for clean energy and energy-efficient technologies for your home or business, please visit: NJCleanEnergy.com.

Home Performance with ENERGY STAR is your “whole-house” solution for a more energy efficient, comfortable and safer home.

ABOUT HOME PERFORMANCE WITH ENERGY STAR®

Our "whole-house" solution will make your home more comfortable and energy efficient – all while saving you money.

Home Performance with ENERGY STAR, brought to you by the New Jersey Board of Public Utilities and its Clean Energy Program, is an efficient approach to home improvements. The nationally acclaimed home improvement program:

- Increases comfort, safety and durability
- Reduces energy usage by up to 30%
- Improves indoor air quality

CERTIFIED Contractors

You can rest easy knowing that only contractors who have the BPI GoldStar designation can be part of the program.

A specially trained and certified technician will perform an assessment of your home to evaluate:

- Health and Safety Concerns
- Air sealing opportunities
- Insulation levels
- Heating/Cooling equipment

Schedule your Home Performance assessment and find out where money is escaping from your home.

Did you know that up to 60%* of energy used to heat and cool homes is wasted due to leaky ducts, inefficient equipment, poor insulation and air leaks?

• High Quality Air Sealing

Homes can lose as much as 25% of their heating and cooling dollars due to inadequate sealing.

• Seal and Insulate Ducts

Insulating and sealing cracked or disconnected ducts helps distribute air more evenly & efficiently and keeps your home more comfortable. Sealing and insulating ducts can improve the efficiency of your heating and cooling system by as much as 20%- sometimes much more.

• Equipment Replacement for Heating Systems and Central Air Conditioning

If your home's heating and cooling equipment is more than 10 years old, it may be time for a high efficiency replacement. ENERGY STAR qualified heating and cooling equipment can be 5-20% more efficient than standard models.
